SUMMARY

Machine Learning and Deep Learning enthusiast with a strong focus on Transformer architectures, Large Language Models (LLMs), and fine-tuning for real-world NLP applications. Experienced in building intelligent systems such as log summarization, anomaly detection, and semantic text processing using frameworks like TensorFlow, PyTorch, and the HuggingFace ecosystem. Possesses solid understanding of Retrieval-Augmented Generation (RAG) for enhancing LLM reasoning with external knowledge sources. Additionally skilled in MERN stack (MongoDB, Express.js, React, Node.js) development for creating scalable, AI-powered web applications and dashboards. Passionate about combining advanced AI research with robust software engineering to solve real-world problems.

EXPERIENCE

Software Development & Machine Learning Intern

Government Research Organization (India) | Jun 2026 – Present

- Developing production-grade frontend applications using React.js and modern JavaScript.
- Designing and implementing reusable UI components to improve maintainability and scalability.
- Working on Machine Learning solutions involving data analysis, feature engineering, model training, and performance evaluation.
- Collaborating with cross-functional teams to integrate ML capabilities into web-based systems.
- Optimizing application performance and ensuring responsive user experiences across devices.
- Following software engineering best practices including version control, testing, and documentation.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C++, HTML5, CSS

Web & Backend: React.js, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS

CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, OS, Computer Networks

AI/ML: TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, NLP, Transformers

Tools: Git, GitHub, VS Code, Jupyter Notebook, MySQL, Azure, Power BI

Soft Skills: Leadership, Initiation, Time Management, Organization, Decision Making, Speech, Teamwork, Communication, Adaptability, Collaboration.

PROJECTS

Distributed-ML: Distributed Machine Learning Platform (Jan 2025 – Present)

- Developed a distributed task execution platform using master-worker architecture for ML training, fine-tuning, and inference workloads.
- Implemented REST API-based communication, task scheduling, worker monitoring, and real-time execution tracking using Python and Node.js.
- Designed scalable backend workflows supporting parallel execution and efficient resource utilization.

LINK: [Akshat-Sh101/Distributed-ML: Ai layer implemented](#)

Nuvio: MERN E-Commerce Platform (June 2023 – August 2023)

- Built a full-stack e-commerce application using MongoDB, Express.js, React.js, and Node.js.
- Developed responsive frontend interfaces with React and Tailwind CSS integrated with REST APIs.
- Implemented authentication, cart, order, and product management modules.

LINK: https://github.com/Akshat-Sh101/Nuvio_EcommerceStore

Log Summarizer – LLM Fine-Tuning (Sept 2024 – Nov 2024)

- Fine-tuned a transformer-based T5 model for automated summarization of application and system logs.
- Developed preprocessing and inference pipelines using Hugging Face Transformers and TensorFlow.
- Improved readability and analysis efficiency of large-scale log streams.

LINK: <https://github.com/Portable-Log-Monitoring/LogginApp/tree/main>

DateCraft: Intelligent Date Formatter (Jan 2024 – Mar 2024)

- Developed an NLP-based date extraction and normalization system using TensorFlow.
- Built preprocessing pipelines to standardize dates from noisy unstructured text.
- Enhanced extraction accuracy compared to traditional regex-based approaches.

LINK: <https://github.com/Akshat-Sh101/DateCraft>

PROBLEM SOLVING

-
- Solved 250+ DSA and algorithmic problems across LeetCode and GeeksforGeeks.
 - Strong understanding of arrays, trees, graphs, dynamic programming, recursion, and backend fundamentals.

ACHIEVEMENTS

-
- Gate Qualified CSE with AIR 2519 and DA with AIR 3024 (2026).
 - Completed Deep Learning Specialization by DeepLearning.AI on Coursera, focusing on Neural Networks and Deep Learning.
 - Completed Microsoft Azure Data Fundamentals course.
 - Smart India Hackathon (SIH2025) Finalist.
 - Successfully published a research paper in springer publication on Multi-Agent Coordination Protocols (MCPs)

EDUCATION

Dronacharya College of Engineering Gurugram University	Gurgaon, India
Bachelor of Technology – Computer Science and Engineering: 8.7/10.0 GPA	2023 – 2027
GD Goenka Public School Central Board of Secondary Education	Gurgaon, India
Grade 12th – Senior Secondary: 90%	2023
Grade 10th – Secondary: 93%	2021
